Incomplete response to election of species requirement

1. In response to the election of species requirement mailed 09-10-03, Applicants made an election the naratriptan as the 5HT1 agonist which reads on claims 27, 32, 43 and 44 and COX-2 inhibitors as the non-narcotic analgesic which reads on the claims 30, 35, 39 and 40. However, the elections(not single species but two species) made by the applicant is not comply with the 35 USC 121 whereby applicant is required to elect a single disclosed species from under the instant claims of the elected group.

This application contains claims directed to the following patentably distinct species of the claimed invention: a 5HT1 agonist or a non-narcotic analgesic.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species(e.g. naratriptan or specific species for non-narcotic analgesic such as rofecoxib or celecoxib as a COX-2 inhibitor for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. As evidenced by numerous documents, naratriptan is patentably distinct species fronm the COX-2 because each species is classified differently, for instance, naratriptan is classified under 514/414 whereas cox-2 inhibitor such as rofexcoxib classified under 514/473. Each species has separate medical utilities and uses separate biological pathway, for instance, naratriptan inhibits 5HT1 whereas refecoxib inhibits COX-2 and considered as non-narcotic analgesic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

Application/Control Number: 09/575,277

Art Unit: 1614

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. There were several attempts was made to Mr. Rusche, Frederick to request an oral election to the above restriction requirement, but did not result in an election being made in the timely manner.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vickie Kim whose telephone number is 703-305-1675. The examiner can normally be reached on Tuesday-Friday. If attempts to reach the
